

Artisano oven

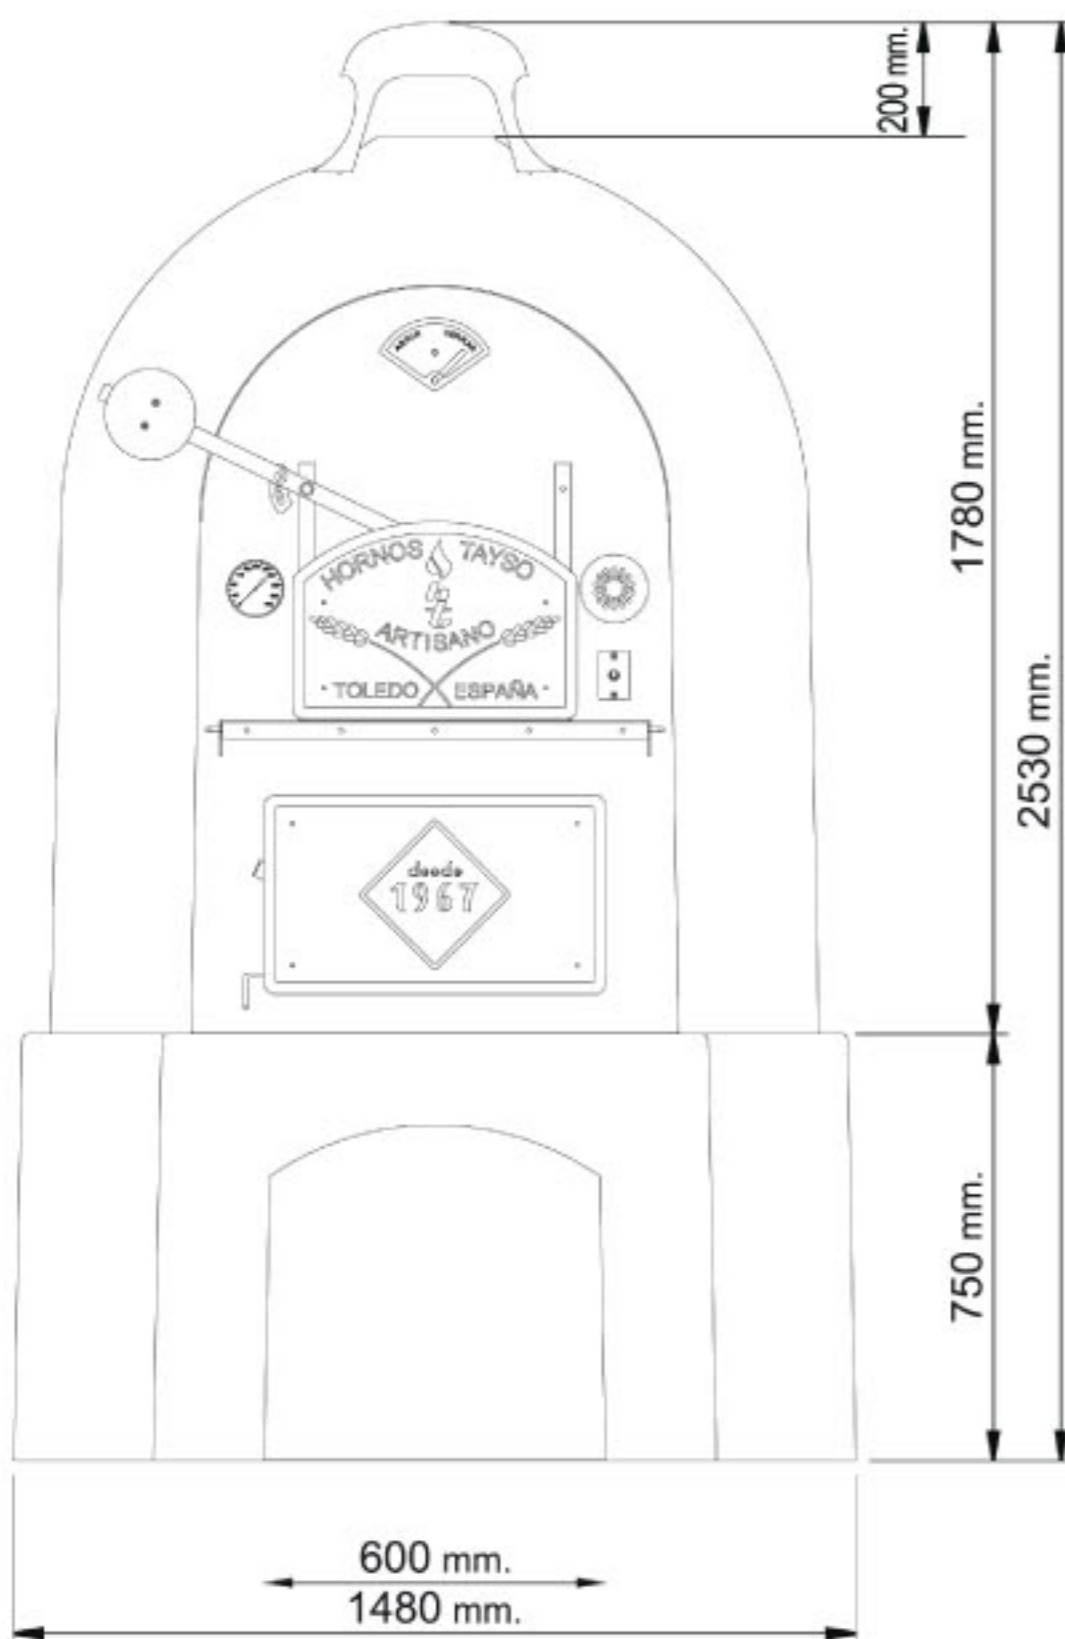

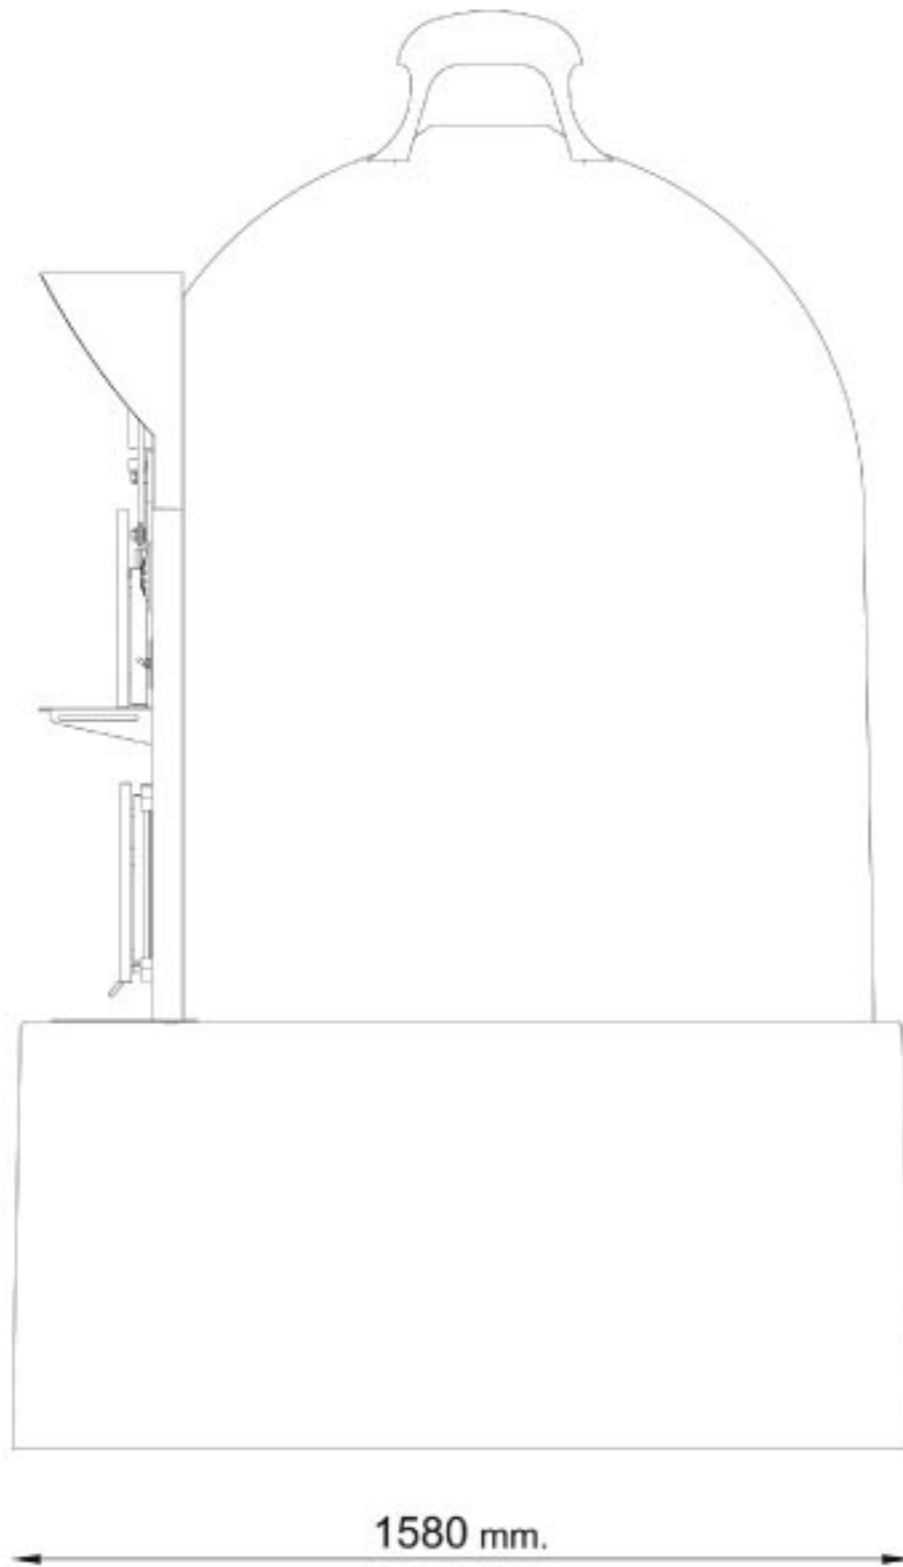

The ideal oven for those who want to enjoy traditional hearth baking using refractory stone. **A wood-burning oven that allows the continuous baking** of all kinds of roasts, paellas and pizzas, as well as bakery and pastry products.

It can be a tool of great beauty and utility for restaurant professionals who want to set themselves apart, thereby providing their establishments with the image of traditional flavour while continuing to provide a practical system that allows working with various products at any temperature.

HORNOS TAYSO

The baking chamber is designed so that there is practically no heat transmission to the exterior, and it has a simple and efficient air entry system that provides optimum combustion.

A grill can be positioned inside the baking chamber in order to take advantage of the coals.

The **Artisano oven** is delivered fully equipped, and it only requires the electrical connection for the lighting. It is equipped with a thermostat that indicates the interior temperature of the baking chamber.

It can be installed indoors by connecting the chimney to a fume exhaust, or it can be installed outdoors as a decorative element in the garden.

The bottom has storage space for wood.

The baking chamber door opens and closes by a simple counter-weight system, thereby allowing the door to remain open at different positions. This door is effectively insulated in order to prevent heat transmission to the exterior. A shelf is installed underneath the door in order to facilitate the preparation and handling of dishes and products. This shelf is equipped with a bar on either side for holding utensils such as scissors, scoops, tongs, etc. The **Artisano oven** is delivered with a decorative housing, which covers the thick insulation layer that prevents heats from becoming a problem for indoor installations. It can also be delivered without the housing so that the **Artisano oven** can be matched to the decoration of your kitchen or restaurant.
